TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js, JavaScript, TypeScript, React Native, Tailwind CSS, Redux, Vite

Backend: Node.js, Express, Django, Flask, RESTful APIs, GraphQL, JWT, Axios, MongoDB

DevOps & Tools: AWS, CloudFlare, Git, Postman, Jest, Figma, Netlify, Heroku, Vercel, Render

EDUCATION

Bachelor of Engineering – Software Engineering **Aug 2022 - Jun 2026 (Expected)**
Sichuan University · Average: 87.55% · CGPA: 3.65/4.00

WORK EXPERIENCE

Full-Stack Developer **Nov 2025 - Current**

Xinjiang Donghua Tongchuang Information Technology Co. Ltd (Remote)

- Developed and maintained full-stack applications using React.js, Vue.js, and Node.js, implementing responsive UIs and RESTful APIs to deliver seamless user experiences across multiple projects.
- Optimized application performance by implementing code splitting, lazy loading, and database query optimization, reducing page load times by 45% and improving overall system efficiency.

Frontend Developer **Apr 2025 - Nov 2025**

SXSY Works, Chengdu, China

- Developed and enhanced a React.js and Umi.js application, utilizing LESS and wow.js to create a visually engaging, user-friendly interface with interactive elements and smooth animations.
- Optimized the code structure and development workflow, resulting in a more maintainable, scalable, and efficient frontend architecture.

Data Science & Big Data Intern **Feb 2025 - Mar 2025**

Chengdu SunCaper Data Co. Ltd, Chengdu, China

- Conducted large-scale data analysis on Yelp's open dataset (6.6M+ reviews, 192K+ businesses) using Python (Pandas, NumPy) and SQL, then developed an interactive analytics dashboard with React, D3.js, and Framer Motion that enhanced user engagement by 35%.
- Engineered an AI-powered recommendation system using DeepSeek API, improving click-through rates by 28% through optimized prompt engineering.

Software Developer Intern **Dec 2024 - Feb 2025**

Papalazius Mercantile Inc: Papalazius Books (Remote)

- Automated product listings by integrating the Keepa API for real-time book data and optimized Amazon SP API workflows, boosting processing speed by 67% and eliminating manual entry.
- Engineered a full-stack shipping management portal with React and Tailwind CSS, streamlining inventory tracking and enhancing operational efficiency following a major API compliance migration.

PROJECTS

StrabismusCare — AI-Powered Strabismus Screening & Management

- Developed an AI-driven mobile app for automated strabismus screening, achieving 98% accuracy using Vision Transformer models. Built a React Native interface with a seamless backend and secure EHR connectivity for real-time patient management. Enhanced diagnostic efficiency with JS processing time, improving accessibility for remote eye care.
- Tech Stack: React Native, Node.js, Flask, PyTorch, MongoDB, AWS, Firebase, Socket.IO

Fork & Friends — Data Analytics & AI Recommendation Platform

- Built an interactive analytics dashboard with React, D3.js, and Framer Motion, and engineered an AI-powered recommendation system with DeepSeek API to provide personalized restaurant suggestions.
- Tech Stack: Python, React, D3.js, Node.js, DeepSeek API, Prompt Engineering

EcoSphere — Sustainable E-Commerce Platform

- A full-stack e-commerce platform promoting eco-friendly living with a mobile-responsive UI, featuring a product catalog, sustainable filtering, carbon footprint tracking, and curated categories to encourage sustainable lifestyle adoption.
- Tech Stack: Vue.js, Pinia, JavaScript, CSS, MongoDB, Vite, Firebase, Stripe

ADDITIONAL SKILLS

Technical Skills: Agile Development, JIRA Management, Scrum Project Management

Languages: English, Bangla, Hindi, Urdu, Chinese (Beginner)
